

## Specifications for Double Ball Bearing 775 Motor

Product Model: RS-775 Brushed DC Motor

Product size: diameter 42.2\*66.5 excluding magnetic guard)

Conventional output shaft size: 5mm \*16

Operating voltage: DC 36 V and below

Body material: galvanized high-strength casing, double ball bearings

Material of rotor: pure copper coil, high-performance silicon steel sheet

No load speed: supports customization

Customization range: 1500 – 16000rpm

Customized minimum order quantity: 200 units

Packaging quantity: 50 units/box

Packaging material: foam inner box+carton packaging

Package size: 370\*250\*280

Single box weight: 18.2 KG

**RS-775**

## Specifications for Double Ball Bearing 555 Motor

Product Model: RS-555 Brushed DC Motor

Product size: diameter 35.9\*57 excluding magnetic guard)

Conventional output shaft size: 3.175\*9

Operating voltage: DC 36 V and below

Body material: galvanized high-strength casing, double ball bearings

Material of rotor: pure copper coil, high-performance silicon steel sheet

No load speed: supports customization

Customization range: 2500 – 18000rpm

Customized minimum order quantity: 1000 units

Packaging quantity: 100 units/box

Packaging material: foam inner box+carton packaging

Package size: 350\*260\*170

Single box weight: 22.8 KG

## Specifications for Double Ball Bearing 997 Motor

Product Model: RS-997 Brushed DC Motor

Product size: diameter 51.5\*86(excluding  
magnetic guard)

Conventional output shaft size: 6.3mm \*20

Operating voltage: DC 36 V and below

Body material: galvanized high-strength  
casing, double ball bearings

Material of rotor: pure copper coil, high-  
performance silicon steel sheet

No load speed: supports customization

Customization range: 1500 – 7500rpm

Customized minimum order quantity: 200  
units

Packaging quantity: 20 units/box

Packaging material: foam inner box+carton  
packaging

Package size: 470\*260\*140

Single box weight: 15 KG

## Specifications for Double Ball Bearing 895 Motor

Product Model: RS-895 Brushed DC Motor

Product size: diameter 48\*72(excluding  
magnetic guard)

Conventional output shaft size: 5mm \*16

Operating voltage: DC 36 V and below

Body material: galvanized high-strength  
casing, double ball bearings

Material of rotor: pure copper coil, high-  
performance silicon steel sheet

No load speed: supports customization

Customization range: 1500 – 16000rpm

Customized minimum order quantity: 200  
units

Packaging quantity: 40 units/box

Packaging material: foam inner box+carton  
packaging

Package size: 370\*250\*260

Single box weight: 20.5 KG

**RS-895**

## Specifications for Double Ball Bearing 795 Motor

Product Model: RS-895 Brushed DC Motor

Product size: diameter 42.2\*70.5 excluding  
magnetic guard)

Conventional output shaft size: 5mm \*16

Operating voltage: DC 36 V and below

Body material: galvanized high-strength  
casing, double ball bearings

Material of rotor: pure copper coil, high-  
performance silicon steel sheet

No load speed: supports customization

Customization range: 1500 – 16000rpm

Customized minimum order quantity: 200  
units

Packaging quantity: 50 units/box

Packaging material: foam inner box+carton  
packaging

Package size: 370\*250\*280

Single box weight: 19.5 KG
